## Foreword

We are pleased to publish this quarter's Consumer Price Index (CPI) publication.

The statistical information presented in this publication contains a wealth of information that measures quarterly changes in prices of a "basket" of goods and services, which are representative of purchases by private households in Palau.

We acknowledge with great appreciation the valuable contributions of many offices of the National Government and state governments as well as those participating establishments for enabling us to continue the collection of prices on a quarterly basis for the selected items within the Palau CPI. With your cooperation and assistance, we will continue to publish the Palau CPI to account for the changes in the prices of commodities consumed by all the people residing in Palau.

Sincerely,

Casmir E. Remengesau  
Director

# Explanatory Notes

## **Brief Description of the Palau Consumer Price Index:**

The Consumer Price Index (CPI) measures quarterly changes in prices of a 'basket' of goods and services, which are representative of purchases by private households in Palau. This 'basket' covers a wide range of goods and services, arranged in the following eight groups: Food & Beverages; Alcohol, Tobacco & Betel nut; Clothing and Footwear; Housing; Household Operations; Transportation; Health, Personal Care, Education & Services; Leisure & Entertainment. Examples of items priced in each major group can be found in Appendix 2.

The Palau CPI measures price changes over time. It does not measure difference in price levels between groups or sub-groups. The base period for the Palau index is the second quarter of 2008.

## **Weighting of the CPI 'Basket'**

The weighting is based on the results from the 2006 *Household Income and Expenditure Survey* (HIES). The weights on expenditure groups are displayed in the CPI tables appearing in the subsequent pages. The sum of all the eight weighted groups is equal to 100. Each weight for a certain expenditure group represents the percentage of consumer expenditure on that expenditure group in 2006. For example, the weight for the Food and Beverage group in Palau is 25.35 percent; consequently, about 25 percent of the household expenditure in Palau is used for food and beverage purchases. More details on the weights for each major group and sub-group can be found in Appendix 1.

## **Prices**

Prices of goods and services included in the CPI are collected quarterly in the middle month of each quarter, from a representative range of retail outlets.

## **Domestic and Imported Price Indexes**

These sub-indexes can give an indication of factors driving CPI price changes. The import index includes only items that are imported, such as canned foods, fuels, rice, motor vehicles. On the other hand, the domestic index includes items and services that are locally produced and have a local component, such as fresh fish, local produce, bakery goods, seafarers and electricity.

Note, however, that the prices for domestic items may be determined by prices of imported items. For example, if price of fuel, an imported commodity, should increase this will cause an upward movement in the domestic CPI index, because a higher fuel price causes an increase in price for items which are reflected in the domestic index.

In Palau, like other countries in the Pacific, imported items and services dominate household consumption, resulting in a weight of 57.03 percent. In other words, imported items represent around 57 percent of the overall consumer spending, while domestic items make up around 43 percent of consumer spending.

## Analysis of CPI Changes:

Movements in index numbers from one period to another can be expressed in index points or as percentage changes. The following example illustrates the method of calculating changes in index points and percentage changes between any two periods. It is simply a difference between the current quarter index and the previous quarter index. The difference is divided into the previous quarter's index to generate the percent change between those two periods.

### **Example (quarterly change)**

Reference Periods: 1<sup>st</sup> Quarter 2012 – 4<sup>th</sup> Quarter 2011

Change in Index:  $112.1 - 111.8 = 0.3$

Change in Percent:  $0.3/111.8 = .003$

$.003 * 100 = 0.3\%$

### **Example (annual change)**

Reference Periods: 1<sup>st</sup> Quarter 2012 – 1<sup>st</sup> Quarter 2011

Change in Index:  $112.1 - 103.9 = 8.2$

Change in Percent:  $8.2/103.9 = .079$

$.079 * 100 = 7.9\%$

## For Further Information

In addition to the statistics included in this publication, the Office of Planning and Statistics may have further details available. Inquiries should be directed to Ms. Muriell Sinsak, Associate Planning Analyst, Office of Planning and Statistics at phone: (680) 767-1269, fax: (680) 767-5642; or email: ops@palaugov.org.

## **PALAU CPI - SUMMARY OF MOVEMENTS FOR 2017 QTR 4**

### Summary of Quarterly Movement

The Palau quarterly inflation rate for this quarter is 1.4 percent; this is a 1.6 percentage point increase on the equivalent quarterly inflation for the same period last year. The groups contributing to this increase are Household Operations group at 6.5%, Housing group at 1.7%, Leisure & Entertainment group at 0.8%, Food & Beverages group at 0.5% and Health, Personal care, Education & Services group at 0.4%. The remaining groups: Alcohol, Tobacco & Betel nut group, Clothing & Footwear group, and Transportation group showed no price change this quarter.

This quarter's inflation rate can be further analyzed for domestic and imported items (Table 4). Domestic items increased by 2.5%, while imported items increased by 0.8% over the last quarter.

More details on what has caused the latest quarterly movement can be found in the "quarterly change analysis" section of this report.

### Summary of Annual Movement

The Palau annual inflation rate for this quarter is 1.9 percent; this is a 1.5 percentage point increase on the annual inflation for the same period last year. The following groups all showed increases, with Household Operations group at 6.7%, Housing group at 3.9%, Leisure & Entertainment group at 2.3%, Food & Beverages group at 1.7%, and Transportation group at 1.3%. The groups that decreased are Clothing & Footwear group at -7.4% and Health, Personal care, Education & Services group at -1.6%. The remaining group, Alcohol, Tobacco & Betel nut group showed no price change this year.

The annual inflation rate can be further analyzed for both domestic and imported items (Table 4). Domestic items increased by 2.9% while, imported items increased by 1.2% over the last year.

More details on what has caused the latest annual movement can be found in the "annual change analysis" section of this report.

## PALAU CPI – ANALYSIS OF INDEX, ANNUAL AND QUARTERLY

Table 1 below shows the value of the index for each major group, and its change over time both from an annual and quarterly perspective. More information regarding the interpretation of the changes from both annually and quarterly can be found in the next two sections of the analysis in this report.

**Table 1: Palau Consumer Price Indexes by Major Group**

Period	All groups	Food & beverages	Alcohol, tobacco & betel nut	Clothing & footwear	Housing	H'hold operations	Transport <sup>n</sup>	Health, personal care, education & services	Leisure & entertain <sup>l</sup>

## PALAU CPI – QUARTERLY CHANGE ANALYSIS, March 2011 – December 2017

### DECEMBER QUARTER KEY POINTS

#### ALL GROUPS CPI

- Increased by 1.4 percent over the last quarter.

#### OVERVIEW OF CPI MOVEMENTS

- Groups that showed positive price changes include the Household Operations group, Housing group, Leisure & Entertainment group, Food and Beverages group, and Health, Personal Care, Education & Services group. These changes are mainly due to price increase in utilities, household appliances & furniture, frozen chicken, chips, and dog food.

## PALAU CPI – ANNUAL CHANGE ANALYSIS, 2002 – 2017

Table 3 and Figure 2 below provide detailed information on the annual change in the Palau CPI dating back to December 2002. Given this publication refers to the fourth quarter of 2017 (December 2017), the annual increase presented in this analysis relate back to the fourth quarter of previous years.

### ANNUAL KEY POINTS

#### ALL GROUPS CPI

- Increased by 1.9% over the last 12 months.

#### OVERVIEW OF CPI MOVEMENTS

- The annual increase of 1.9 percent noticed for the last 12 months was largely driven by the increase in Household Operations group, Housing group, Leisure & Entertainment group, Food & Beverages group and Transportation group. Some of the items that contributed the most to these groups' increase includes utilities, household appliances & furniture, household maintenance, and fuel. Other factors contributing to these increase from the food & beverages group includes frozen chicken and chips.

NB: The annual change represents the change from September to September each year.

Figure 2: Palau CPI, Annual Change, All Groups, December 2002 – December 2017

# PALAU CPI – MAJOR GROUP ANALYSIS

The following section of analysis looks more at the impact of each major group to the CPI over the last few years.

Figure 3 below examines how each major group has fared over the last 2 year and 5 year time periods.

## KEYPOINT ANALYSIS

- Over the last 2 years, the index has increased by 1.2 percent, whereas, the equivalent increase over the last 5 years is 1.9 percent.
- The major groups with the biggest increase in the last 5 years were the Alcohol, Tobacco & Betel nut group (6.1% per year), followed by Housing group (4.9 % per year) and Health, Personal care, Education & Services (3.6% per year).
- All groups showed an increase over the past 5 years except for Transportation group (-0.9% per year).

Figures 4, 5 and 6, show the change in index for each of the major groups since the re-base in June 2008.

Figure 3: Palau CPI, Annual Growth of Major Groups, 2yr & 5yr

Figure 5: Palau CPI, Index for Clothing & Footwear; Housing; and Household Operations, March 2011 –December 2017

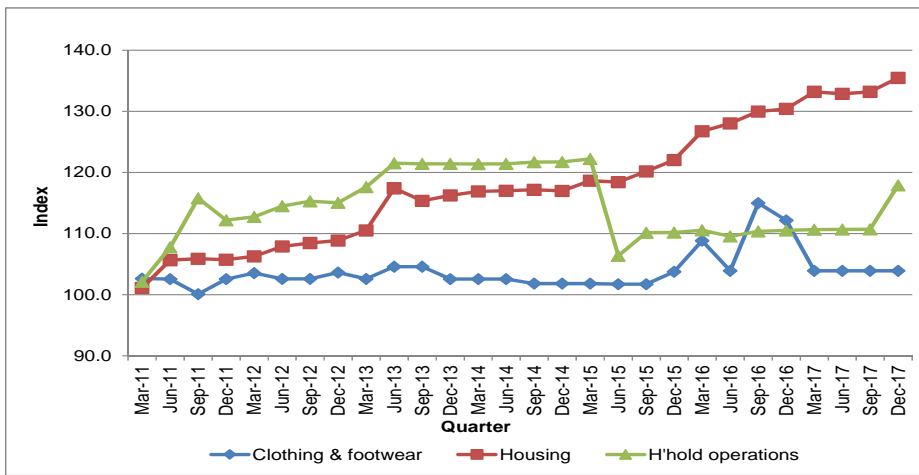

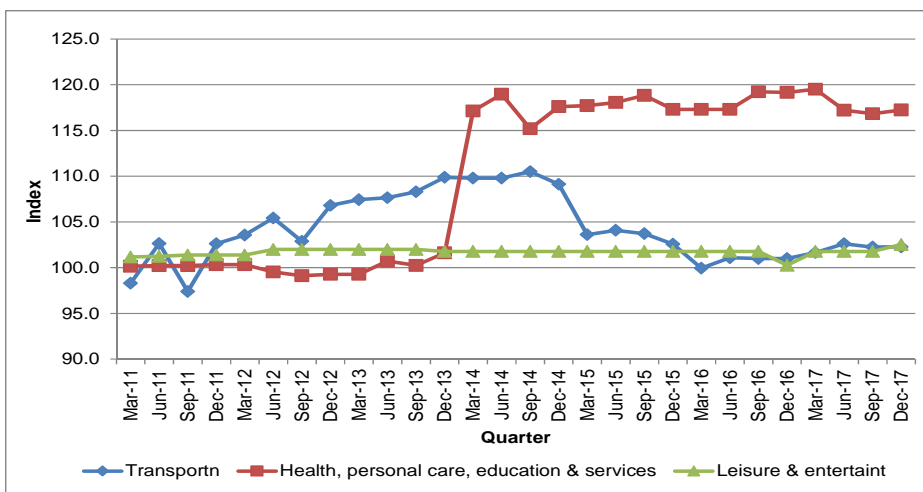

Figure 6: Palau CPI, Index for Transportation; Health, Pers. Care, Educ. & Services; and Leisure & Ent. March 2011 – December 2017

## PALAU CPI – DOMESTIC V IMPORTED ITEM ANALYSIS

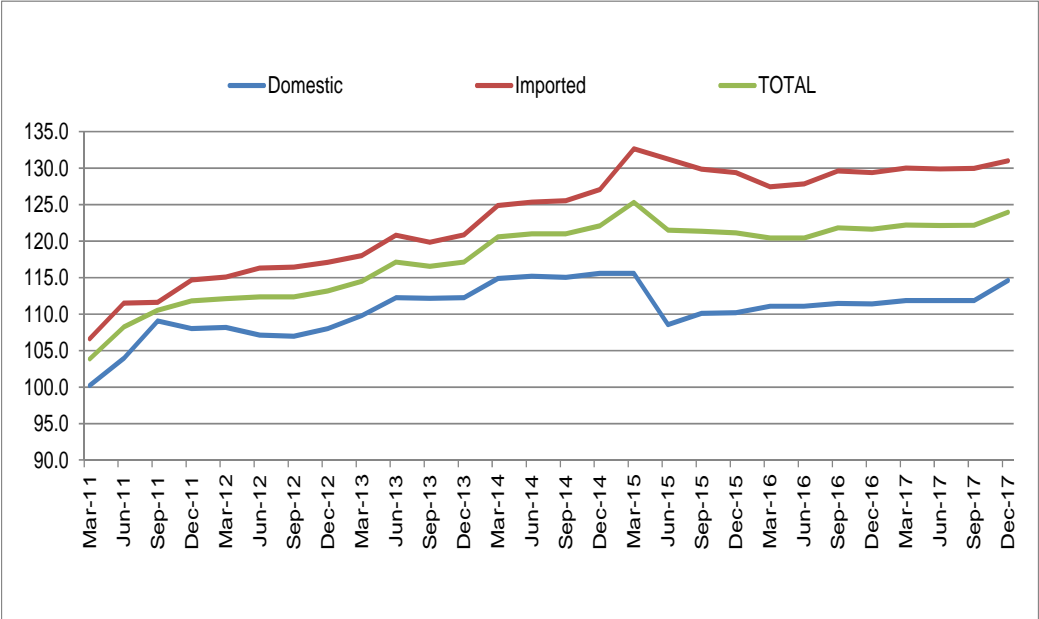

The final analysis section examines the impact of both domestic and imported item on the CPI for Palau. As discussed in the explanatory notes, imported items make up the bulk of household expenditure, accounting for 57 percent in total, with the remaining 43 percent covering expenditure on domestic items.

Both Table 4 and Figure 7 show the change in the index for both groups since the re-base in June 2008. As can be seen from this analysis, during this period, imported items have increased by about 31 percent whilst domestic items have increased by approximately 15 percent.

Table 4: Palau CPI: Domestic v Imported Index, March 2011 – December 2017

<b>Quarter</b>	<b>Domestic</b>	<b>Imported</b>	<b>TOTAL</b>
Mar-11	100.2	106.6	103.9
Jun-11	103.9	111.5	108.2
Sep-11	109.1	111.6	110.5
Dec-11	108.0	114.7	111.8
Mar-12	108.2	115.1	112.1
Jun-12	107.1	116.3	112.4
Sep-12	107.0	116.4	112.4
Dec-12	108.0	117.1	113.2
Mar-13	109.8	118.0	114.5
Jun-13	112.3	120.8	117.1
Sep-13	112.2	119.8	116.5
Dec-13	112.2	120.8	117.1
Mar-14	114.9	124.9	120.6
Jun-14	115.2	125.4	121.0
Sep-14	115.0	125.5	121.0
Dec-14	115.6	127.0	122.1
