Re: Announcement of Monthly Shipping Schedules

Dear Minister Obichang,

Hope this letter finds you in good health and spirit. This serves as a response to your letter MPIIC-20-053 dated on March 25, 2020 regarding our shipping schedules announcement and availability during this COVID-19 stage. On behalf of Eurasia I would like to reiterate our commitment to serve the islands especially Palau in the face of this unfortunate situation that we are in.

Despite of the challenges that we are facing globally which have led to highly quarantine restriction and extended transit times, Eurasia and its partner carrier Mariana Express Lines Ltd. (MELL) will continue to fulfill our obligation to serve the islands with our current shipping frequency. Moreover, attached is our partner MELL's response letter stating that although the COVID-19 outbreak is affecting the global market, it does not lay major affects to our commitment to serve the local communities and that we are doing the best we can to maintain our current services.

Yes, we are aware of several misinformation aroused within the public about the shipping services to be stopped, and we would like to help rid of these by providing and make readily available to the public of our updated shipping schedules. Our latest sailing schedule is also attached for your reference.

Once again, we thank you for your patient and understanding and rest assured we will continue to work together to continue to provide essential services to our communities to the best we can during this adversity.

Best Regards,
