Foreword

We are pleased to publish this quarter's Consumer Price Index (CPI) publication.

The statistical information presented in this publication contains a wealth of information that measures quarterly changes in prices of a "basket" of goods and services, which are representative of purchases by private households in Palau.

We acknowledge with great appreciation the valuable contributions of many offices of the National Government and state governments as well as those participating establishments for enabling us to continue the collection of prices on a quarterly basis for the selected items within the Palau CPI. With your cooperation and assistance, we will continue to publish the Palau CPI to account for the changes in the prices of commodities consumed by all the people residing in Palau.

Sincerely,

Casmir E. Remengesau
Director

Explanatory Notes

Brief Description of the Palau Consumer Price Index:

The Consumer Price Index (CPI) measures quarterly changes in prices of a ‘basket’ of goods and services, which are representative of purchases by private households in Palau. This ‘basket’ covers a wide range of goods and services, arranged in the following twelve groups: Food and non-alcoholic beverages; Alcoholic beverages, tobacco and narcotics; Clothing and footwear; Housing, water, electricity, gas and other fuels; Furnishings, household equipment and routine household maintenance; Health; Transport; Communication; Recreation and culture; Education; Restaurants and hotels; Miscellaneous goods and services. Examples of items priced in each major group can be found in Appendix 2.

The Palau CPI measures price changes over time. It does not measure difference in price levels between groups or sub-groups. The base period for the Palau index is the third quarter of 2016.

Weighting of the CPI ‘Basket’

The weighting is based on the results from the 2014 *Household Income and Expenditure Survey* (HIES). The weights on expenditure groups are displayed in the CPI tables appearing in the subsequent pages. The sum of all the twelve weighted groups is equal to 100. Each weight for a certain expenditure group represents the percentage of consumer expenditure on that expenditure group in 2014. For example, the weight for the Food and non-alcoholic beverages group in Palau is 23.62 percent; consequently, about 24 percent of the household expenditure in Palau is used for food and non-alcoholic beverage purchases. More details on the weights for each major group and sub-group can be found in Appendix 1.

Prices

Prices of goods and services included in the CPI are collected quarterly in the middle month of each quarter, from a representative range of retail outlets.

Domestic and Imported Price Indexes

These sub-indexes can give an indication of factors driving CPI price changes. The import index includes only items that are imported, such as canned foods, fuels, rice, motor vehicles. On the other hand, the domestic index includes items and services that are locally produced and have a local component, such as fresh fish, local produce, bakery goods, seafarers and electricity.

Note, however, that the prices for domestic items may be determined by prices of imported items. For example, if price of fuel, an imported commodity, should increase this will cause an upward movement in the domestic CPI index, because a higher fuel price causes an increase in price for items which are reflected in the domestic index.

In Palau, like other countries in the Pacific, imported items and services dominate household consumption, resulting in a weight of 57.03 percent. In other words, imported items represent around 64 percent of the overall consumer spending, while domestic items make up around 36 percent of consumer spending.

Analysis of CPI Changes:

Movements in index numbers from one period to another can be expressed in index points or as percentage changes. The following example illustrates the method of calculating changes in index points and percentage changes between any two periods. It is simply a difference between the current quarter index and the previous quarter index. The difference is divided by the previous quarter's index to generate the percent change between those two periods.

<p><u>Example (quarterly change)</u></p> <p>Reference Periods: 1st Quarter 2012 – 4th Quarter 2011</p> <p>Change in Index: 112.1 - 111.8 = 0.3</p> <p>Change in Percent: $0.3/111.8 = .003$</p> <p style="padding-left: 40px;">$.003 * 100 = 0.3\%$</p> <p><u>Example (annual change)</u></p> <p>Reference Periods: 1st Quarter 2012 – 1st Quarter 2011</p> <p>Change in Index: 112.1 – 103.9 = 8.2</p> <p>Change in Percent: $8.2/103.9 = .079$</p> <p style="padding-left: 40px;">$.079 * 100 = 7.9\%$</p>

For Further Information

In addition to the statistics included in this publication, the Office of Planning and Statistics may have further details available. Inquiries should be directed to Ms. Muriell Sinsak, Senior Planning Analyst, Office of Planning and Statistics at phone: (680) 767-1269, fax: (680) 767-5642; or email: ops@palaugov.org.

PALAU CPI - SUMMARY OF MOVEMENTS FOR 2021 QTR 2

Summary of Quarterly Movement

The Palau quarterly inflation rate for this quarter is 1.7 percent; this is a 3.5 percent point increase on the equivalent quarterly inflation for the same period last year. The contributors to this increase include Transport group at 9.3 percent, Housing, water, electricity, gas, & other fuels group at 2.6 percent, Miscellaneous goods & services group at 1.5 percent, Recreation & culture group at 0.7 percent and Food & non-alcoholic beverages group at 0.6 percent. Groups that experienced a decline include Clothing & footwear group at 5.1 percent, Furnishings, household equipment & routine household maintenance group at 3.1 percent, Education group at 0.9 percent and Alcoholic beverages, tobacco & narcotics group at 0.1 percent. The remaining groups saw little or no price change this quarter.

This quarter's inflation rate can be further analyzed for domestic and imported items (Table 4). Domestic items declined by 0.1 percent while, imported items increased by 2.6 percent over the same period last year.

More details on what has caused the latest quarterly movement can be found in the "quarterly change analysis" section of this report.

Summary of Annual Movement

The Palau annual inflation rate for this quarter saw 1.0 percent or an increase of 1.4 percentage point compared to the same period last year. In the last 12 months, the following groups that saw an increase were Transport group at 19.2 percent, Restaurants & hotels group at 5.1 percent, Miscellaneous goods & services group at 2.9 percent, Health group at 2.6 percent, and Recreation & culture group at 0.7 percent. On the other hand, groups that experienced a decline include Housing, water, electricity, gas, & other fuels group at 11.1 percent, Furnishings, household equipment & routine household maintenance group at 5.2 percent, Clothing & footwear group at 1.2 percent, and Food & non-alcoholic beverages group at 1.1 percent. The remaining groups saw little or no annual price change.

The annual inflation rate can be further analyzed for both domestic and imported items (Table 4). Domestic items declined by 4.9 percent while, imported items increased by 4.2 percent over the same period last year.

More details on what has caused the latest annual movement can be found in the "annual change analysis" section of this report.

PALAU CPI – ANALYSIS OF INDEX, ANNUAL AND QUARTERLY

Table 1 below shows the value of the index for each major group, and its change over time both from an annual and quarterly perspective. More information regarding the interpretation of the changes from both annually and quarterly can be found in the next two sections of the analysis in this report.

PALAU CPI – QUARTERLY CHANGE ANALYSIS, DECEMBER 2016-JUNE 2021

JUNE QUARTER KEY POINTS

ALL GROUPS CPI

- Increased by 1.7 percent compare to last quarter.

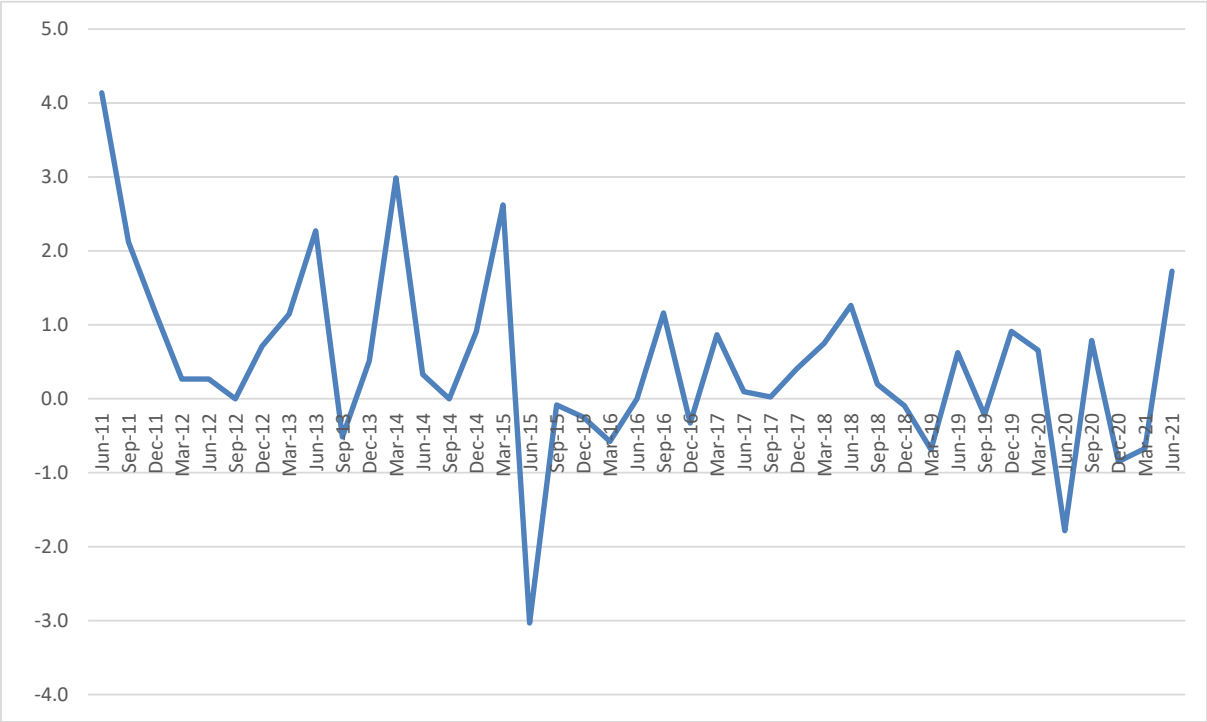

OVERVIEW OF CPI MOVEMENTS

- Groups that saw price increase include Transport group, Housing, water, electricity, gas & other fuels group, Miscellaneous goods & services group, Recreation & culture group, and Food & non-alcoholic beverages group. These changes were mainly due to price change in fuel products, utilities, and hygiene products.

PALAU CPI – ANNUAL CHANGE ANALYSIS, 2017 - 2021

ALL GROUPS CPI

- The annual inflation saw an increase of 1.0 percent over the last 12 months.

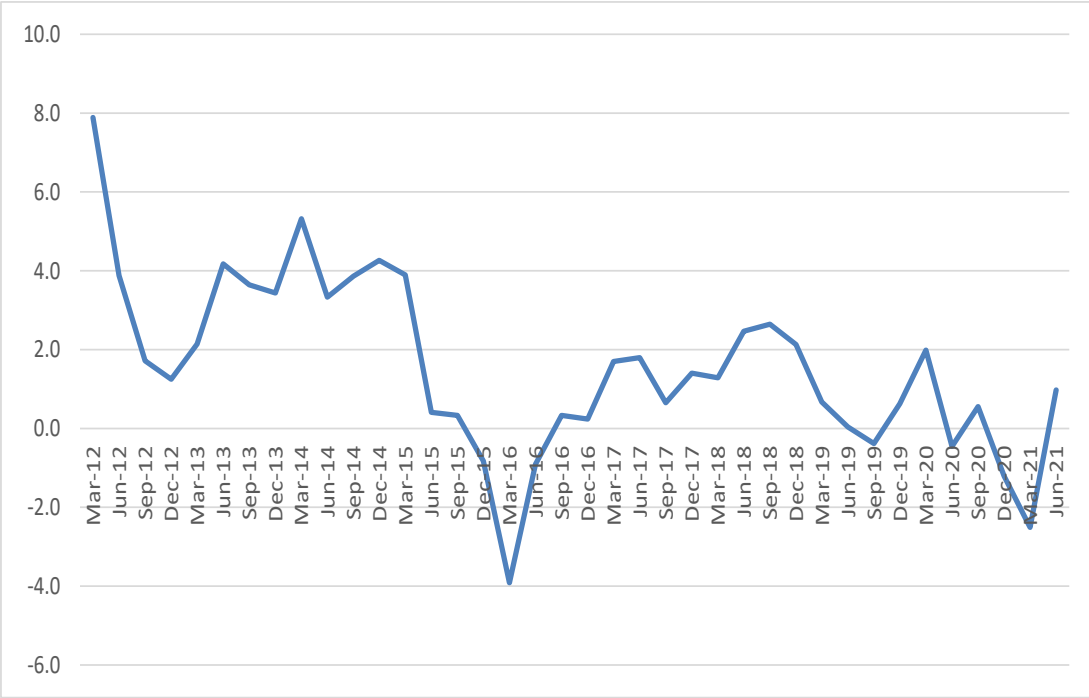

OVERVIEW OF CPI MOVEMENTS

- In the last 12 months, groups that saw an increase were Transport group, Restaurants & hotels group, Miscellaneous goods & services group, Health group, Recreation & culture group, Alcoholic beverages, tobacco & narcotics group and Communication group. Items that contributed the most to these groups' increase include fuel products, bento pack, hair dressing, hygiene products, and prescription medicines.

Figure 2: Palau CPI, Annual Change, All Groups, March 2012 – June 2021

PALAU CPI – DOMESTIC V IMPORTED ITEM ANALYSIS

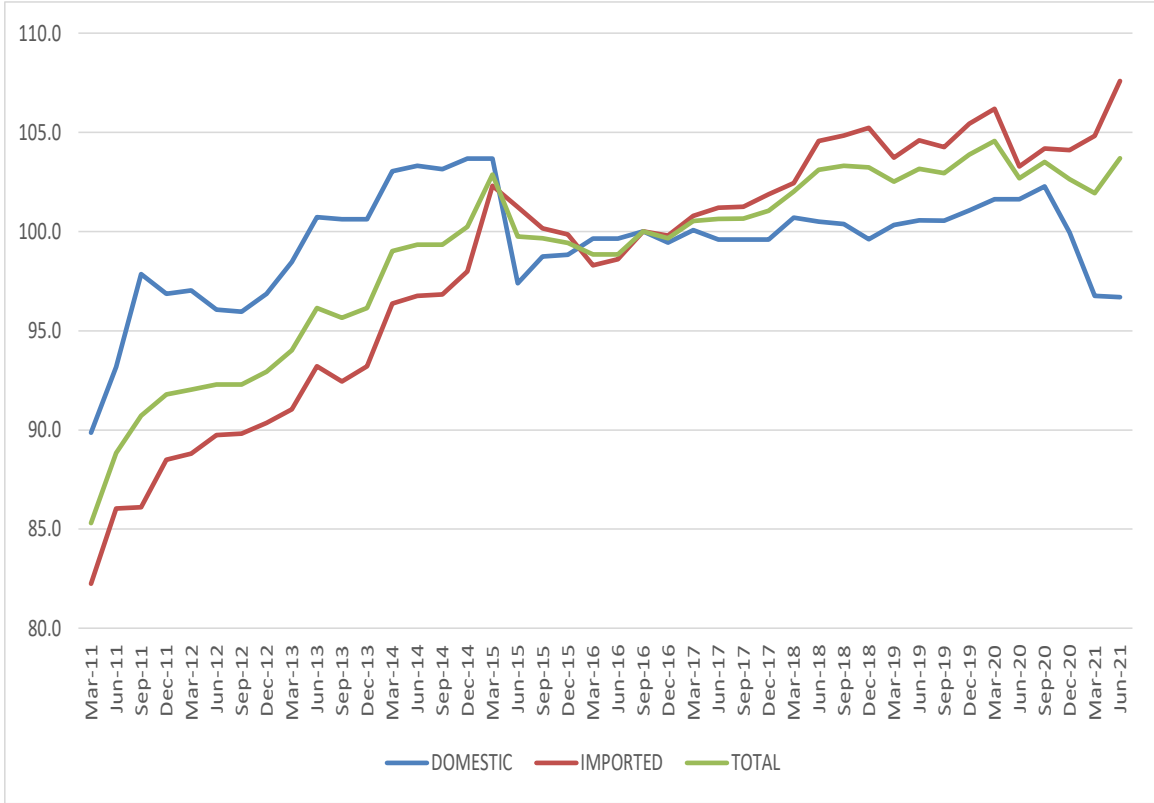

The final analysis section examines the impact of both domestic and imported item on the CPI for Palau. As discussed in the explanatory notes, imported items make up the bulk of household expenditure, accounting for 64 percent in total, with the remaining 36 percent covering expenditure on domestic items.

Both Table 4 and Figure 3 show the change in the index for both groups since the re-base in September 2016. As can be seen from this analysis, during this period, domestic items saw a decline of 4.9 percent while imported items saw an increase of 4.2 percent annually.
