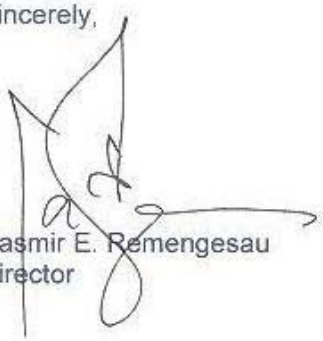
Foreword

We are pleased to publish this quarter's Consumer Price Index (CPI) publication.

The statistical information presented in this publication contains a wealth of information that measures quarterly changes in prices of a "basket" of goods and services, which are representative of purchases by private households in Palau.

We acknowledge with great appreciation the valuable contributions of many offices of the National Government and state governments as well as those participating establishments for enabling us to continue the collection of prices on a quarterly basis for the selected items within the Palau CPI. With your cooperation and assistance, we will continue to publish the Palau CPI to account for the changes in the prices of commodities consumed by all the people residing in Palau.

Sincerely,



Casmir E. Remengesau
Director

APPENDIX 1: WEIGHT FOR MAJOR GROUPS 13

APPENDIX 2: EXAMPLES OF ITEMS BEING PRICED 14

Explanatory Notes

Brief Description of the Palau Consumer Price Index:

The Consumer Price Index (CPI) measures quarterly changes in prices of a 'basket' of goods and services, which are representative of purchases by private households in Palau. This 'basket' covers a wide range of goods and services, arranged in the following twelve groups: Food and non-alcoholic beverages; Alcoholic beverages, tobacco and narcotics; Clothing and footwear; Housing, water, electricity, gas and other fuels; Furnishings, household equipment and routine household maintenance; Health; Transport; Communication; Recreation and culture; Education; Restaurants and hotels; Miscellaneous goods and services. Examples of items priced in each major group can be found in Appendix 2.

The Palau CPI measures price changes over time. It does not measure difference in price levels between groups or sub-groups. The base period for the Palau index is the third quarter of 2016.

Weighting of the CPI 'Basket'

The weighting is based on the results from the 2014 *Household Income and Expenditure Survey* (HIES). The weights on expenditure groups are displayed in the CPI tables appearing in the subsequent pages. The sum of all the twelve weighted groups is equal to 100. Each weight for a certain expenditure group represents the percentage of consumer expenditure on that expenditure group in 2014. For example, the weight for the Food and non-alcoholic beverages group in Palau is 23.62 percent; consequently, about 24 percent of the household expenditure in Palau is used for food and non-alcoholic beverage purchases. More details on the weights for each major group and sub-group can be found in Appendix 1.

Prices

Prices of goods and services included in the CPI are collected quarterly in the middle month of each quarter, from a representative range of retail outlets.

Domestic and Imported Price Indexes

These sub-indexes can give an indication of factors driving CPI price changes. The import index includes only items that are imported, such as canned foods, fuels, rice, motor vehicles. On the other hand, the domestic index includes items and services that are locally produced and have a local component, such as fresh fish, local produce, bakery goods, seafarers and electricity.

Note, however, that the prices for domestic items may be determined by prices of imported items. For example, if price of fuel, an imported commodity, should increase this will cause an upward movement in the domestic CPI index, because a higher fuel price causes an increase in price for items which are reflected in the domestic index.

In Palau, like other countries in the Pacific, imported items and services dominate household consumption, resulting in a weight of 57.03 percent. In other words, imported items represent around 64 percent of the overall consumer spending, while domestic items make up around 36 percent of consumer spending.

Analysis of CPI Changes:

Movements in index numbers from one period to another can be expressed in index points or as percentage changes. The following example illustrates the method of calculating changes in index points and percentage changes between any two periods. It is simply a difference between the current quarter index and the previous quarter index. The difference is divided by the previous quarter's index to generate the percent change between those two periods.

Example (quarterly change)

Reference Periods: 1st Quarter 2012 – 4th Quarter 2011

Change in Index: 112.1 - 111.8 = 0.3

Change in Percent: 0.3/111.8 = .003

.003 * 100 = 0.3%

Example (annual change)

Reference Periods: 1st Quarter 2012 – 1st Quarter 2011

Change in Index: 112.1 – 103.9 = 8.2

Change in Percent: 8.2/103.9 = .079

.079 * 100 = 7.9%

For Further Information

In addition to the statistics included in this publication, the Office of Planning and Statistics may have further details available. Inquiries should be directed to Ms. Muriell Sinsak, Senior Planning Analyst, Office of Planning and Statistics at phone: (680) 767-1269, fax: (680) 767-5642; or email: ops@palaugov.org.

PALAU CPI - SUMMARY OF MOVEMENTS FOR 2023 QTR 1

Summary of Quarterly Movement

The Palau quarterly inflation rate experienced an increase in movement of 8.7 or 8.4 percent over the previous quarter. The following Major Groups contributed strongly to the increase:

COICOP_Expenditures Group	% Changes compared to Previous Qtr.	Difference compared to Previous Qtr.
✓ Transport	11.3	14.7
✓ Housing, water, electricity, gas and other fuels	9.1	13.6
✓ Restaurants and hotels	12.4	12.4
✓ Miscellaneous goods and services	8.3	7.5
✓ Alcoholic beverages, tobacco and narcotics	8.8	7.4
✓ Food and non-alcoholic beverages	9.9	6.9
✓ Health	2.5	2.5
✓ Communication	2.0	1.9
✓ Furnishings, household equipment and routine household maintenance	4.2	1.1
✓ Recreation and culture	1.7	1.1

This quarter's inflation rate can be further analyzed for domestic and imported items (Table 4). Domestic items show an increase of 6.0 percent while imported items realized an increase of 9.7 percent.

More details on what has caused the latest quarterly movement can be found in the "quarterly change analysis" section of this report.

Summary of Annual Movement

The Palau annual inflation rate for this quarter saw a 16.9 percent increase or 3.2 percentage point increase compared to the same period last year. In the last 12 months, the groups that saw large increases were as follows:

COICOP_Expenditures Group	% Changes compared to corresponding month (March 2022 – March 2023)	Difference compared to corresponding month.
✓ Alcoholic beverages, tobacco and narcotics	16.7	16.6
✓ Miscellaneous goods and services	12.1	11.3
✓ Restaurants and hotels	13.3	11.2
✓ Furnishings, household equipment and routine household maintenance	9.8	6.9
✓ Clothing and footwear	5.7	6.6
✓ Health	4.0	5.9
✓ Food and non-alcoholic beverages	19.8	5.7
✓ Transport	22.6	3.8
✓ Communication	2.0	2.0

The annual inflation rate can be further analyzed for both domestic and imported items (Table 4). Domestic items realized an increase of 12.8 percent while, imported items also experienced an increase of 19.0 percent.

More details on what has caused the latest annual movement can be found in the "annual change analysis" section of this report.

NOTE: Please note that for this 1st quarter of 2023, effective from January 01, 2023 most goods and services sold or consumed in Palau are subject to 10% Palau Goods and Services Tax, or PGST.

PALAU CPI – ANALYSIS OF INDEX, ANNUAL AND QUARTERLY

Table 1 below shows the value of the index for each major group, and its change over time both from an annual and quarterly perspective. More information regarding the interpretation of the changes from both annually and quarterly can be found in the next two sections of the analysis in this report.

PALAU CPI – QUARTERLY CHANGE ANALYSIS, December 2016 – March 2023

MARCH QUARTER KEY POINTS

ALL GROUPS CPI

- Showed an increase of 8.7 or 8.4 percent compared to the last quarter.

OVERVIEW OF CPI MOVEMENTS

- Movements in the CPI March quarter, 2023 are higher than in previous years, attributed mostly to the rise in the pricing of goods and services in January during the implementation of PGST. These changes were largely driven by the price increases in milk, cheese and eggs, bread and cereals, materials for the maintenance and repair of the dwelling, vegetables, mineral water, soft drinks, fruit and vegetable juices, hairdressing salons and personal grooming establishments, restaurants, cafes and the like, beer and food products n.e.c. Conversely, the Housing, water, electricity, gas, and other fuels group and the Transport group experienced an increase mainly driven by the increase in kerosene, gasoline, LP Gas, diesel, and electricity prices.

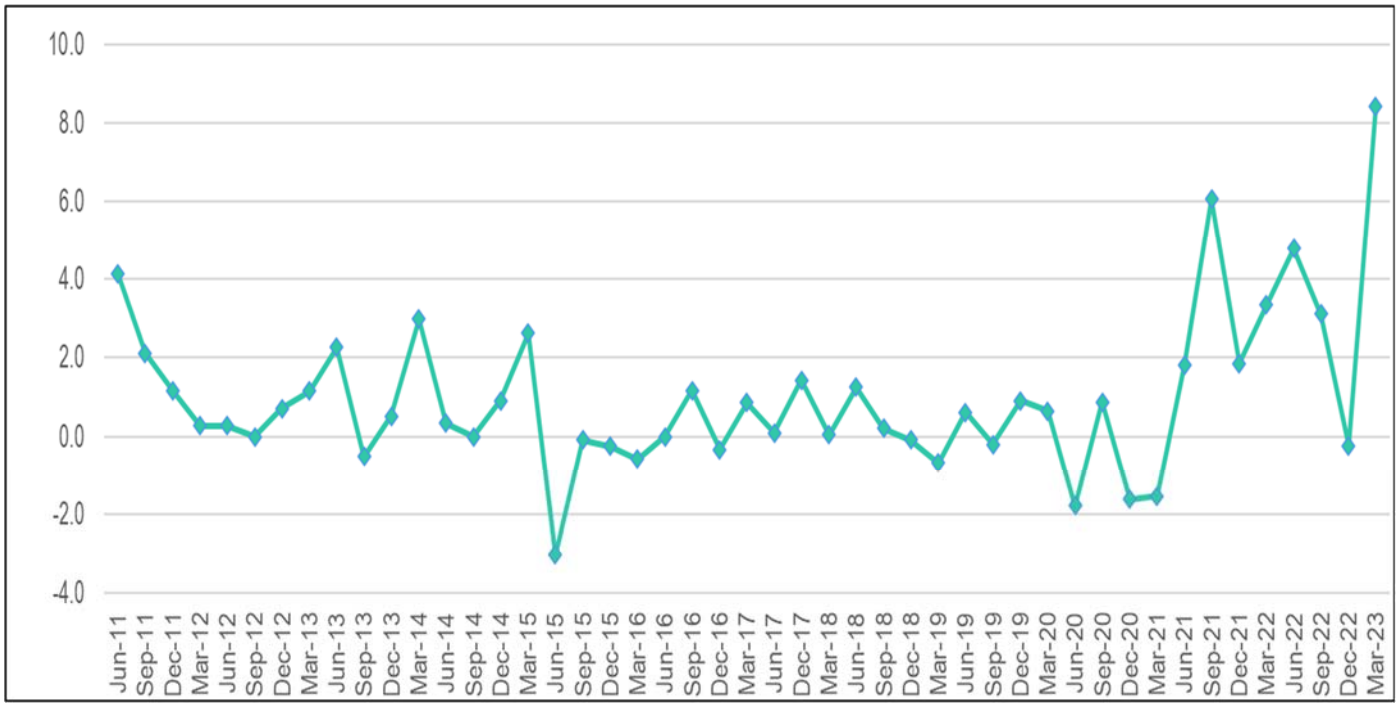

Figure 1.1: Palau CPI, Quarterly Change, All Groups, March 2023

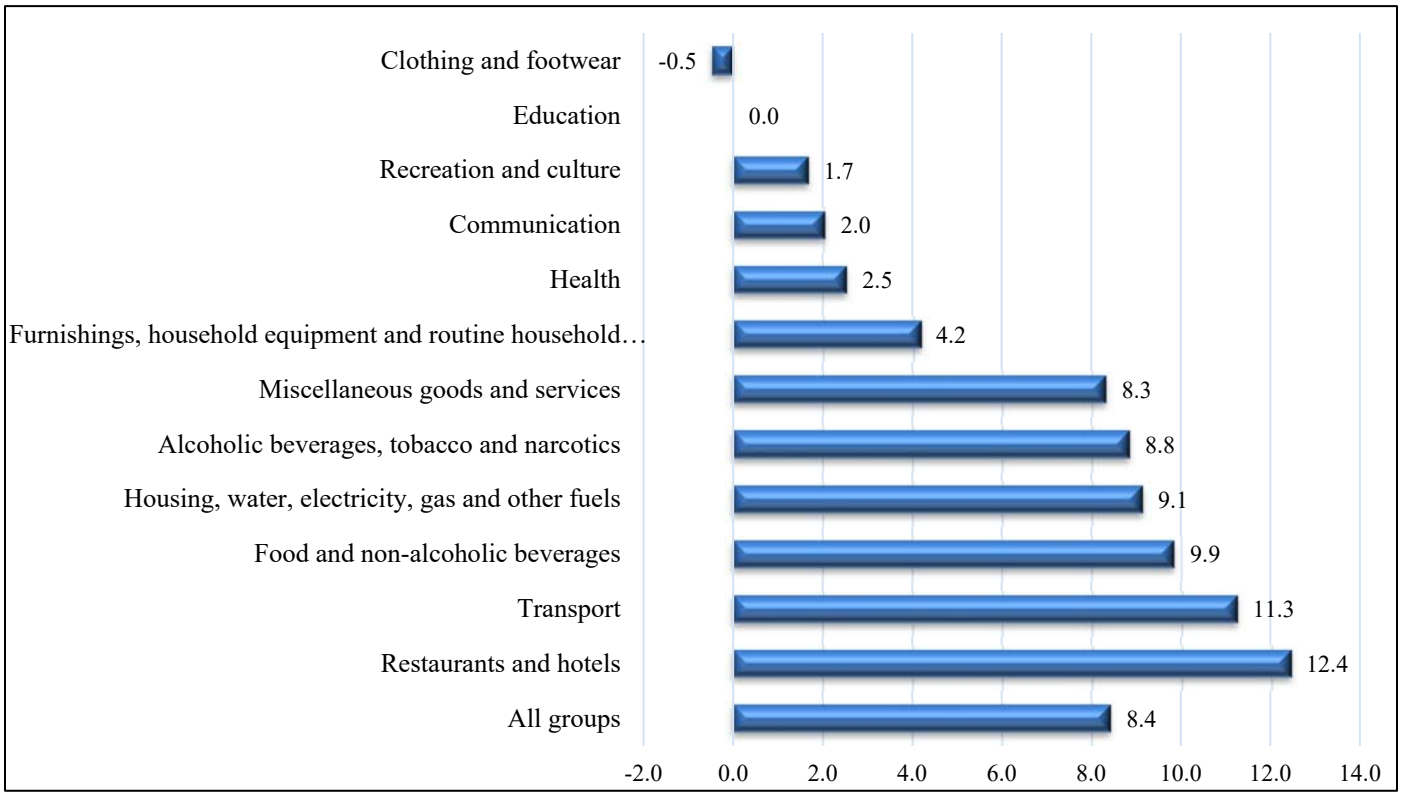

PALAU CPI – ANNUAL CHANGE ANALYSIS, 2017 - 2023

ALL GROUPS CPI

- The annual inflation saw an increase of 16.9 percent over the last 12 months.

OVERVIEW OF CPI MOVEMENTS

- In the last 12 months, all groups increased. Non-food items that contributed the most to these increases include electricity rate, plywood, school uniforms, gasoline, diesel, motor oil, boat rental, and airfare. In the Food and non-alcoholic beverages group, items that contributed the most to the increase include rice, flour, frozen chicken, frozen pawns, eggs, frozen beef, local taro, and canned goods.

PALAU CPI – DOMESTIC V IMPORTED ITEM ANALYSIS

The final analysis section examines the impact of both domestic and imported item on the CPI for Palau. As discussed in the explanatory notes, imported items make up the bulk of household expenditure, accounting for 64 percent in total, with the remaining 36 percent covering expenditure on domestic items.

Both Table 4 and Figure 3 show the change in the index for both groups since the re-base in September 2016. As can be seen from this analysis, during this period, domestic items saw an increase of 12.8 percent while imported items saw an increase of 19.0 percent annually.
